Subject: Microsoft Anti-Trust Case

Guys, just get it over with already!!!! This cloud that hangs is hanging over the entire IT industry and is only exasturbating economic recovery.

I am a hug Microsoft fan. But while I don't agree with alot of things that Microsoft does and they can be anti-competitive, like forcing vendors to pay for an OS license even if they don't put it on a machine, some of the things I see proposed are just ludicrous. It also shows a COMPLETE ineptitude by non-technical people who are just hurting consumers not helping. I could do a MUCH better job with the remedies.

Now the states want Microsoft to make Linux versions of office to "force competition". Why not ask Sun to make a Windows version of office. You know why they won't.... BECAUSE NO ONE WANTS IT. There is NO market!!!

Bottom line.... get it over with NOW. Let this country move on. Technology in the U.S. is our STRONGEST asset that will let us lead the world, don't destroy it by stupid petty stuff!!

Just 2 2c.
